

DIABETES INNOVATION IN PRACTICE PROGRAMME

Lead the change in diabetes care with continuous glucose monitoring

All fields are mandatory

Suitability

I provide care for people living with diabetes. ☐

I can commit to the dates set out for mandatory face-to-face modules, virtual project updates and additional self-directed learning. ☐

Name

Email

Contact number

Job role

Please enter your phone number in international format,
for example +446123456789

ICB/Health board/Social care

Project

Tell us how you would like to improve diabetes care using sensing technology in your local community, regionally, or nationally, as part of the Diabetes Innovation In Practice Programme.

Experience

The programme involves you being able to reflect thoughtfully on professional experience. Tell us about a time at work where you demonstrated leadership, and what you learned about yourself as a leader as a result.

Collaboration

Give an example of how you have collaborated with a multidisciplinary team, including people with diabetes, and what you learned from your peers.

.....

To achieve maximum impact, you will need full and active support from your supervisor or a senior representative in your organisation. Please provide their name, job title and email address. If your application is successful, they will be contacted for confirmation of their support.
